ENGINEERED PROTECTION FOR MISSION-CRITICAL EQUIPMENT

Your equipment is critical—and failure is not an option.
ZERO designs and manufactures protective solutions built to perform in demanding environments.

From standard products to fully customized designs, our team delivers precision-engineered cases backed by advanced manufacturing and decades of expertise.

ENGINEERING
CAPABILITIES

- In-House Design Support
- Custom Foam & Panels
- 3D Modeling Expertise

MANUFACTURING
CAPABILITIES

- Precision Fabrication
- Certified Processes
- Custom Tooling Solutions

STANDARDS & COMPLIANCE

ZERO products and processes meet recognized industry standards:

MIL-STD 810, 108, 130	MIL-PRF-28800	SAE AMS 2770	AWS-D17.1 / D17.2	ISO 9001 / AS9100	ITAR & DFARS COMPLIANT

Laser Cutting and Precision Punching

Certified Welding

Rotomolding

Anodizing, Chem Filming, Powder Coat, & Wet Paint

Custom Tooling and Assembly

Engineering and Design Support

TRANSIT & STORAGE CONTAINERS

High-capacity, rugged containers engineered to protect mission-critical equipment in demanding environments. They combine lightweight aluminum and heavy-duty roto-molded constructions, with options for watertight seals and custom interiors to support reliable transit, storage, and deployment.

MODULAR CONTAINERS

RUGGEDIZED CASE

VAL-AN

TRANSITAINER

CARRYING CASE

Portable, field-ready cases that protect sensitive instruments, tools, and electronics on the move. Deep-drawn aluminum and injection-molded plastic designs provide a balance of durability, weight, and professional appearance, with custom foam, panels, and environmental options for specific missions.

CENTURION POLARIS

GUARDIAN

CENTURION ELITE

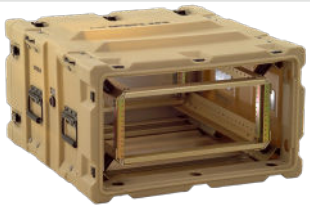

VALULINE

RACKMOUNT SYSTEMS

Rugged rackmount enclosures designed to secure 19" electronics for military, aerospace, and industrial use. Lightweight and roto-molded options deliver shock isolation, watertight performance, and high-G protection, ensuring reliable operation for mission-critical rack-mounted systems.

WARRIOR

SCOUT

ZERAK

VAL-AN 900

SEAMLESS ALUMINUM HOUSING

Precision-engineered seamless aluminum housings and components for electronics and embedded assemblies. Extensive standard sizes and value-added machining, hardware, and finishes enable ready-to-integrate enclosures tailored to demanding aerospace, defense, and industrial requirements.
