SEAMLESS ALUMINUM HOUSINGS

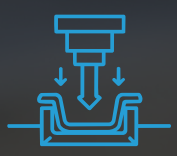

PRECISION-BUILT HOUSINGS FOR SENSITIVE ELECTRONICS

ZERO seamless aluminum housings use deep-drawn, single-piece construction for precise, lightweight protection without welded seams.

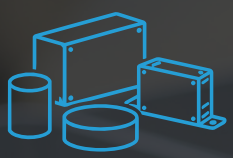

Available in standard and custom configurations for your dimensional and integration requirements.

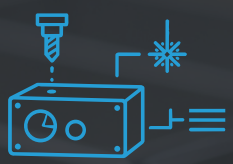

DEEP-DRAWN ALUMINUM
BUILT TO YOUR REQUIREMENTS

PRECISION
MANUFACTURING
Deep-drawn construction with precision heighttrimming

FLEXIBLE
CONFIGURATIONS
Square, rectangular, round, flanged, and ARINC style housings.

CUSTOM
INTERGRATION
Holes, piercings, finishes, markings, and application- specific modifications.

MADE IN USA

SEAMLESS CONSTRUCTION
BUILT AROUND YOUR APPLICATION

From compact electronics to avionics, ZERO offers deep-drawn housings designed around specific dimensional and integration requirements.

SQUARE/ RECTANGULAR CANS & COVERS

Single-piece housings for electronics, sensors, and components requiring a seamless enclosure.

ROUND CANS & COVERS

Seamless round housings with configurable heights for cylindrical components and electronics.

FLANGED SQUARE/RECTANGULAR CANS

Compact housings for small components where space, fit, and precision matter.

FLANGED ROUND CANS

Seamless housings with integrated flanges for mounting and equipment integration.

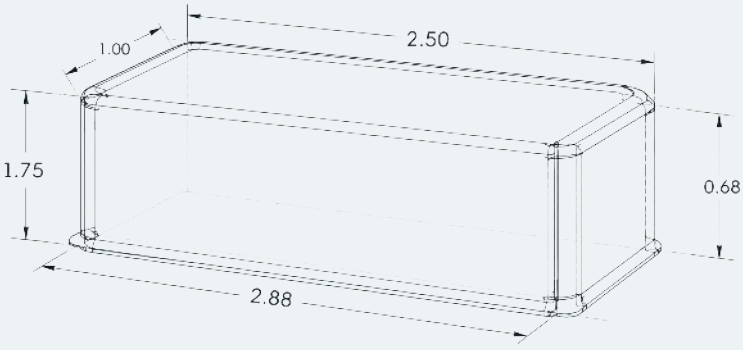

ARINC STYLE HOUSINGS

Deep-drawn housings for avionics and applicable ARINC dimensional requirements.
